ANGANWADI WORKERS IN
THE QUALITY LIFE OF CHILDREN IN MANIPUR
(A SOCIOLOGICAL ANALYSIS)

DR. SERAM BHOGENDRA SINGH

HEAD, DEPARTMENT OF SOCIOLOGY
S. KULA WOMEN’S COLLEGE, NAMBOL, MANIPUR.

ABSTRACT
It is rightly said that women health is the health of the society. Healthy parents produce healthy children in the society. The present study will discuss and analyze on the dimensions in particular to the pre education, nutrition and health care because it is for the welfare of the people of Manipur particularly for the quality life of the children of Manipur in the near future. The present research paper will probe into the insight the programme structure and try to explore the challenges that have encounter in the present scenario of the Manipur state and to put an appropriate strategy for enhancement of the programme in the near future.

To analyze the data according to the body weight of children we reveal that the maximum no. of beneficiary children have their weight in the green zone i.e carried 51.22%, and followed by yellow zone carried 36.58% and red zone 12.20 % respectively. Most of the rural children are start their education from Anganwadi centre.

KEY WORDS: Anganwadi workers, quality life, health, nutrition, pre-school education etc.
