ABSTRACT
The main objective of this paper is to enlighten the nature of FDI and the challenges faced by the country due to play in global markets. The globalization has brought a lot of challenges in doing business across the world. The business of multinational companies are being extended and established in various countries with emerging economics. The companies in emerging economics are increasingly accessing the global markets to fulfill their capital needs by getting their securities listed on the stock exchange outside the country. The result in making the capital market global in nature. FDI is directly linked with core national priorities such as raising manufacturing growth to 25% of GDP, significant job creation and bringing high end technology into the country.
