ABSTRACT:

Ratio analysis is indeed a powerful tool to measure performance of an organisation. For banks, statutory liquidity ratio and cash reserve ratio are very important. Reserve of India is the regulating authority but banks have to maintain SLR and CRR. Current ratio and liquid ratios are extremely helpful in providing valuable insight of banks current assets and current liabilities. The objective of the paper is to analyse current ratio and liquid ratio of selected private sector banks and find out if there is any significant difference between the ratios.

KEYWORDS: Ratio, analysis, banks.
